Comments: This Laboratory Grown Diamond was created by Chemical Vapor Deposition (CVD) growth process and may include post-growth treatment Type IIa

This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® pointernational Gemological Institute (GD). A LGD has essentially the chemical, physical and aprical properties as a mined alamand, with the exception of being man-made (a manufactured product). LGD's are typically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) growth processes and may include post growth modifications to change the color. IGI utilizes the most advanced techniques and equipment currently available including. Disocular microscopes, alamand color masters, non-contact-ophical measuring device, a wide range analytical techniques including FIR, UV-VIS-NR, Uv-man spectracopy, and fluorescence analysis at various excitation wavelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation or appraisal and by making the report IGI does not agree to putches or replace the articles.
