This Laboratory Grown Diamond (LGD) described in this Report has been analyzed, graded and Laserscribed® pointernational Gemological Institute (IG). A LGD has essentially the chemical, physical and aplical properties as a mined alamond, with the exception of being man-made (a manufactured product). LGDs are typically produced by CVD (chemical vapor deposition) or by HPH (high pressure high temperature) growth processes and may include post growth modifications to change the color. (IG utilizes the most advanced techniques and equipment currently available including. Disocular microscopes, alamond color masters, non-contact-ophical measuring device, a wide range analytical techniques including FIR, UV-VIS-NR, UV-man spectroscopy, and fluorescence analysis at various excitation wavelengths. This Report Includes advanced security features. This Report is neither a guarantee, valuation or opprisation dby making the report IG does not agree to purchase or replace the articles.
